For nearly one hundred years, the Department of Rhetoric at the University of Minnesota has been helping to shape the debate about *culture, communication, science and technology* and their effects on our lives. With an emphasis on the rhetorical foundations of *technical and scientific discourse*, as well as on culture and communication, the program at UMN is among the Big Ten’s most respected.

Digital communications networks such as the Internet are changing the way people interact with each other, with profound effects on social relations and institutions. Yet many remain excluded from access and meaningful participation. It is timely to consider who is included, who is excluded and what we now know about the composition and activities of online communities.

Internet Research (IR) 4.0 will feature a variety of perspectives on Internet, organized under the theme Broadening the Band. As in previous conferences, the aim is to develop a coherent theoretical and pragmatic understanding of the Internet and those that are empowered and disenfranchised by it. IR 4.0 will bring together prominent scholars, researchers, creators, and practitioners from many disciplines, fields and countries for a program of presentations, panel discussions, and informal exchanges.

IR 4.0 will take place at the Hilton Hotel in the heart of downtown Toronto. The conference is hosted by a team led by The Association of Internet Researchers Toronto 2003 with the Knowledge Media Design Institute (KMDI) and its partners at the University of Toronto. The IR 4.0 steering and working committees reflect the growing pan-Canadian network of Internet researchers, including members from Quebec, Alberta, and New Brunswick, in addition to the local contingent from Toronto, York and Ryerson Universities.

This year’s theme, Broadening the Band, encourages wide participation from diverse disciplines, communities, and points of view. Under the umbrella theme, contributors are called to reflect upon, theorize and articulate what we know from within the emerging interdisciplinary space known as Internet Research.

In a cultural sense, the theme calls attention to the need to examine access, inclusion and exclusion in online communities. What role do race, gender, class, ethnicity, language, sexual orientation, age, geography, and other factors play in the degree of online participation? What are the indicators of meaningful participation?

In a technical sense, the theme points to the development of broadband, wireless and post-internet networks and applications that are currently coming on-stream including community, private, public as well as national research networks (e.g. CA*net 4, Internet 2). We plan to use these technologies to make the conference an internet-mediated and internationally accessible event.

In an organizational sense, the theme reflects a widening of AoIR’s reach to include more researchers and constituencies involved in the evolution of the Internet. French language presentations will be included in the call for papers for the first time. Researchers and practitioners in the arts and culture sectors are encouraged to participate alongside social scientists and humanities scholars and researchers.
In a thematic sense, "Broadening the Band" suggests widening the scope of topics and problematics considered within past conferences, while retaining the consistent emphasis on rigorous research work. This call for papers thus initiates an inclusive search for theoretical and methodological correspondences between this expanding theme and the many disciplinary and interdisciplinary approaches that are required to address it with precision.

**Keynote Speakers:**

**Lucy Suchman** - Thursday, Oct. 16, 11:30 am - 1:00 pm (Toronto I)

Lucy Suchman teaches in the department of Sociology at Lancaster University, UK. She is a Visiting Senior Research Fellow at the Work, Interaction and Technology Research Group at King's College in London, UK. She also works as a researcher for Xerox's Palo Alto Research Center. Dr. Suchman has been examining the correlation between sociology and technology. Her presentation will centre on the ethnographies of sites of technology production and use, and her contributions to emerging reconceptualizations of social/material relations based in anthropology, feminist theory and science and technology studies.

**Pierre Lévy** - Friday, Oct. 17 10:00 am - 11:15 am (Toronto I)

Pierre Lévy, who has been described as a "cyber-philosopher," currently holds a Canada Research Chair in Collective Intelligence at the University of Ottawa. He will be presenting aspects of a cultural evolution theory, his further understanding of knowledge management in digital networks, background on his study into intercultural dialogues in interactive multimedia arts, and how certain behavioural traits fostering collective intelligence in a given population can promote human development.

**Steve Jones** - Friday, Oct. 17 4:00 pm - 5:15 pm (Toronto I)

Steve Jones is a co-founder of AoIR. He is the Head of Communication at the University of Illinois - Chicago, and studies the social history of communication technology. Dr. Jones is the author of six books, which have earned him critical acclaim and interviews for stories in Time, the New York Times, Philadelphia Inquirer, Newsweek and many other newspapers and magazines. He has also been interviewed on radio and TV, and has been a guest on NPR's "Talk of the Nation" and "Sounds Like Science." Dr. Jones will be reflecting on the "future past" of Internet studies.

**Jane Fountain** - Saturday, Oct. 18 11:30 am - 1:00 pm (Toronto I)

Jane Fountain is the Director for the National Center for Digital Government Research and Practice. She also teaches at the John F. Kennedy School of Government at Harvard University. Dr. Fountain's present interests lie at the intersection of governance, organizations, and information technology. Her work leads her into current investigations of the institutional processes that influence the enactment and use of information technologies in government, as well as the structural and behavioral characteristics of inter-organizational networks, and the political economy of gender in computing and new media.

"Reappearances and Oracles"
Saturday October 18, 5:30 to 7:00pm during pre-Gala cocktail - Location: TBA

Film installation by Johannes Birringer (editor)

The first international Interaction Laboratory at the former Coal Mine Göttelborn took place in July 2003, produced by Industrial Culture Saar and organized by director/choreographer Johannes Birringer. Göttelborn is projected to become a future high tech location of the Saarland, a small state in southwest Germany bordering on France and Luxemburg. The Laboratory was designed as an experiment in the re-utilization of the abandoned site which now anticipates economic and architectural development. In this changing landscape of industrial culture, an innovative platform was seeded for integrated research in media and technologies, especially interactive performance and telecommunications. The film reflects the project introducing some of the poetic interactions with the location in the work of the 21 participants of the laboratory who came from four different continents.

Camera: Jim Ruxton, Maria Stamenkovic, Beatrice Sauberbrey and Johannes Birringer.
Editor/Producer: Johannes Birringer

"Songs of Sorrow, Songs of Hope" (2001)
Saturday October 18, 5:30 to 7:00pm during pre-Gala cocktail - Location: TBA.

Directed by Lisa Naugle

A performance commemorating September 11, 2001 tragedies was conducted in real-time at New York University and the University of California, Irvine. At UCI, The Dance and Digital Performance Ensemble, directed by Lisa Naugle, explored new ways to work with technology, sending high-bandwidth audio and video back and forth using Internet 2. Internet 2 allowed each venue to receive sound and video simultaneously. The performers on each coast interacted in a structured improvisational mix using VBrick Systems' television-quality video over IP system, which enables each venue to receive sound and video in real time. One of the visual threads created with John Crawford was "The Machine Meeting Its Reflection" or the image of airplanes crashing into the World Trade Center, meeting their own reflection in the windows; also creating a conceptual reflection on technology, the disaster of it and its power to bounce back and effect us.
